The government of Dominica and Range Developments Limited have signed a Memorandum of Understanding (MOU), for the construction of a high-end luxury brand hotel in the north of the island.

Luxury hotel brand Kempinski has agreed to partner with Range Developments in the venture.

"We look forward to bringing an ultra-luxury branded five star hotel to the Commonwealth of Dominica and realising the Commonwealth of Dominica's ambition to become a luxury destination for tourism in the coming years," said Mohammed Asaria, vice chairman of Range Developments.

line.com

The hotel would have between 75 to 125 rooms.

"This is the first MOU that the Government is signing under the Citizen by Investment Programme; the investment arm of our Economic Citizenship Programme which we believe is the way to go towards addressing economic development issues, employment and greater investment in our tourism industry. So we are very keen on engaging them and moving this process forward," Dominica Prime Minister Roosevelt Skerrett stated.

Range Developments is currently developing the Park Hyatt project in St. Kitts.
